EXECUTIVE SUMMARY

Aspiring Information Technology professional with hands-on internship experience in full-stack web application development and AI integration. Proficient in Python, Java, JavaScript, and Git, with a solid academic foundation in deep learning, LSTM models, Generative AI systems, and audio signal processing. Demonstrates strong problem-solving skills, collaborative team leadership, and a proven track record of organizing technical hackathons and workshops.

TECHNICAL SKILLS:

Programming Languages: Python, Java, C++, JavaScript, C language

Tools & Software: Git, GitHub, VS Code, AWS Cloud, CCNA Networking

Databases: MySQL, MongoDB

Developer Technologies: HTML, CSS, REST APIs, Generative AI (RAG, LLM reasoning), Audio Signal Processing

SOFT SKILLS:

Collaboration & Teamwork: Collaborated with cross-functional teams during internships and projects.

Problem Solving: Strong analytical and algorithmic thinking with effective debugging skills.

Communication & Leadership: Organized department symposiums, hackathons, and device workshops.

Time Management: Managed multiple project lifecycles alongside academic courses.

PROFESSIONAL EXPERIENCE:

LGTG Solutions Pvt. Ltd.

May 2026 - June 2026

Role: AI Intern (Audio Signal Processing)

- **Developed an offline real-time voice translation system** integrating OpenAI Whisper for Automatic Speech Recognition (ASR), Meta NLLB-200 for Neural Machine Translation (NMT), and Piper TTS for speech synthesis.
- **Impact:** Built a full-stack Flask application with a responsive web interface, enabling low-latency, end-to-end multilingual voice and text communication.

Zizzle Technologies India Pvt Ltd

May 2025 - June 2025

Role: Web Development Intern

- **Developed front-end features** and backend API logic for a Quick E-Commerce web application, improving performance and responsiveness.
- **Diagnosed and resolved** critical software bugs in collaboration with cross-functional development teams, enhancing overall system reliability.
- **Impact:** Delivered robust and stable application deployments through active participation in Agile standups, code reviews, and technical documentation.

SepsiSense AI — Early Sepsis Prediction System

Jan 2025 - Apr 2025

- **Developed a Bi-LSTM model** to predict sepsis risk from ICU time-series vital signs and laboratory data, integrating SHAP explainability.
- **Impact:** Detected septic shock 6 to 12 hours earlier than traditional clinical monitoring methods, improving patient outcomes.

TruthShield AI — Misinformation & Scam Detection

Aug 2024 - Dec 2024

- **Built a Generative AI system** to identify scams, deepfakes, and online misinformation using Retrieval-Augmented Generation (RAG).
- **Impact:** Generated real-time scam probability risk scores with actionable alerts, reducing threat response time.

Smart Water Sentinel — Predictive Water Monitoring

May 2024 - Jul 2024

- **Developed an AI-IoT system** for pipeline monitoring, using LSTM time-series models for anomaly and leak detection.
- **Impact:** Pinpointed leak locations on a Web-GIS dashboard to enable proactive infrastructure maintenance.

DocuSense AI — GenAI Document Intelligence

Mar 2024 - Apr 2024

- **Built a RAG assistant** enabling semantic search and LLM reasoning on unstructured document repositories.
- **Impact:** Delivered source-grounded answers with precise citation tracking for enhanced data verification.

Smart Farm BioLoop — AI Precision Agriculture

Jan 2024 - Feb 2024

- **Developed an AI-IoT system** utilizing soil and climate sensors with Random Forest predictive modeling.
- **Impact:** Optimized irrigation and nutrient delivery, increasing crop yield while reducing chemical fertilizer usage.

EDUCATION

Chennai Institute of Technology

Sep 2024 - May 2028

Bachelor of Technology (B.Tech) in Information Technology

- Academic Performance: Cumulative GPA (CGPA) of 7.96 / 10.00

AWARDS & ACCOMPLISHMENTS:

- **Certifications:** AWS Certified Cloud Practitioner, CCNA (Routing & Switching), MongoDB Basics, Skill Intern Data Analytics, Gen AI Internship Course, Anthropic AI Fluency, Claude 101, Claude Code, NPTEL (IoT).
- **Coding Achievements:** Solved 500+ problems on LeetCode and 160+ problems on Skill-Rack.
- **Leadership & Volunteering:** Organized a Samsung Galaxy Device Workshop, a 48-hour Bonfiglioli Hackathon, and the PAPERNZN26 paper presentation event at CIT.
